By Cecilia Harsch Updated December 09, 2018 Your Whirlpool Duet washing machine automatically locks the door as a precaution against opening the door during a wash cycle. If the door did not lock, small hands or preoccupied minds might open the door and allow water to flood the laundry area, or sustain an injury by reaching inside a spinning washtub. The lock remains engaged until the water drains from the tub. Cancelling unintentionally pressed wash cycle options can often unlock the washer, or you can access the manual release ring to unlock the door. Check to see if you accidentally pressed the eAAAFan DryeAAA option as part of the wash cycle. Pressing the power button cancels the "Fan Dry" option and unlocks the door. Press the eAADrain and SpineAAA button on the washer's control panel to attempt to unlock the machine. This may drain any excess water that could cause the machine to remain locked. Once the eAADrain and SpineAAA cycle completes, the door should unlock. Check whether the "Add Garment" button is lit. Pressing the start button unlocks the washing machine if you engaged the eAAAAdd GarmenteAAA feature. Unplug your washer from the wall outlet if none of these steps unlocks the door. Use a T-20 Torx screwdriver to remove the three Torx-head screws along the bottom front of the washer. Pull down on the bottom panel and pull it away from the washer. Reach through the open panel and up to the door lock. Find the release ring below the locking mechanism. Pull down on the ring to unlock the door. If you must manually unlock the washer door after each wash cycle your drain pump or pressure switch may have failed and would need replacing. I had this same thing happen to me today with my KitchenAid front load washer. My house cleaner must have forced the door open when the lock was engaged. I downloaded the KitchenAid Technical Education manual for the front load washer and found the section 8-4 that explained. arocna avorpir e otnemom nu attepsA .otrots otadna "A asoclauQ .etiv al eregnuiggar rep arret ad icillop eud o anihccam al eravellos iarvod eruppo ,anihccam alled eroirefni etrap allen oiclac id artsaip allus elartnec etiv alla eravirra rep etivaiccac led elibisself enoisnetse'nu id ongosib iarva ,IYF .ecilpmes otsottuip enoizulos anu arbmeS .atterroc anihccam al rep etrap al erenetto id olos itarucissa .esab id arudecorp assets al "A .looplrhW rep "A ertneM .eraf asoC artsom ehc)... fs .hvm sl = V ?hctaw/moc.ebutuoy.www// :sptth(ebuTuoY id oediv omitto nu ehcna "A'c am ,olriutitsos e oiggaccolb id omsinacem li erevoumir emoc id enoizageips anu "A'c .elaunam ossets olleN .omsinacem li ottor onnah ehc oraih: "A idniuQ .clic are'c noN .jecillop id 4/1 ad orit(ottaf "A odnauq clic nu icresse ebbervoD .amircal id amrof a avel anu erarit rep oiggaccolb id omsinacem li eregnuiggar e)ellets ert a itiv(oiclac id artsaip al erevoumir reP
